No. 2:19-cr-00013

Chief Judge Crenshaw

**GOVERNMENT’S SUPPLEMENTAL NOTICE OF EXPERT TESTIMONY**

The United States of America, by and through its attorneys, the Acting United States Attorney for the Middle District of Tennessee and the Chief of the Counterterrorism Section of the National Security Division, United States Department of Justice, pursuant to Rules 16(a)(1)(F) and (G) of the Federal Rules of Criminal Procedure, hereby files this supplemental notice of intent to offer evidence that may be construed as expert testimony pursuant to Rules 702 and 703 of the Federal Rules of Evidence in the above-referenced case.

The government filed its initial expert notice on May 15, 2020, identifying two potential expert witnesses. This supplemental notice identifies one additional witness whom the government had not previously identified, but subsequently has determined that it may also call at trial. However, the government contends the below anticipated testimony is more akin to lay witness fact testimony under Rule 701 and therefore, does not need to be disclosed as potential expert testimony pursuant to Rules 702 and 703 of the Federal Rules of Evidence. Nevertheless, out of an abundance of caution, the below individual is being noticed as a potential expert in this case.

**FBI Special Agent Richard Campbell**

FBI Special Agent Richard Campbell is currently the Division Coordinator for the FBI Computer Analysis Response Team and is a Certified Computer Forensic Examiner. During the investigation in this case, Campbell retrieved, examined, and/or analyzed the content and data

retrieved from the defendant's electronic devices seized in this case, including her cellular telephone and computer. Campbell's anticipated testimony regarding the retrieval, examination, and collection of data from the defendant's electronic devices is more akin to that of a fact witness in that he will explain the evidence he located, any software he used to locate and seize that evidence, and, how he verified the accuracy of such evidence. The government anticipates that Campbell will also provide testimony regarding his training and background, including any training related to the methods and/or software used to assist him in the examination of the electronic devices. Courts, including District Courts in the Middle District of Tennessee, have previously held that the extraction of information from an electronic device utilizing technology such as Cellebrite does not qualify as expert testimony subject to Rules 702 and 703 of the Federal Rules of Evidence. A copy of Campbell's curriculum vitae is attached hereto and any reports drafted by Campbell were previously disclosed by the government as part of its Rule 16 discovery obligations.

### **CONCLUSION**

WHEREFORE, the parties request that the Court take notice of the above matters.

Respectfully Submitted,
